Tele-Health Therapy information

Links for information regarding state regulations of tele-counseling for LCSW/LPC

- [Health & Human Services Telehealth Counseling](#)

Confidentiality concern and questions parents to consider

What platform is the therapist using to practice tele-counseling?

- Note that Face-time; Skype; Whats app etc., are not HIPPA compliant and therefore does not conform for confidentiality standards.
- HIPPA compliant platforms include; Zoom, VSee, and Doxy.me. and others.
 - Often the website will state if the provider is using a HIPPA compliant platform

Therapist training?

- While VA does not require specific training in tele-counseling, the parent ought to consider asking the therapist if they have participated in training specific to tele-counseling.

Location

- Tele-Counseling can be provided by any licensed provider who holds a VA state license
- It is encouraged that families pay attention to location of provider if they wish to eventually participate in in-person services.
 - Unless stated, providers are within Prince William County

Insurance Coverage

- As stated in the article above, insurance appears to be covering tele-counseling, however it is encouraged that parents still contact their health insurance to ensure tele-counseling is approved and if there are any restrictions.
- Providers listed below accept various health insurances
